

Use when: A callout starts and you run SARSTREAM for your agency.

Agency page sarstream.org/

Pilot key

- 1 Sign in: **sarstream.org/admin-link** — your email, or the admin code.
- 2 Mission: starts by itself when a drone powers on or streams. Or tap **Start mission**. ✎ **Rename** it.
- 3 Pilots: **Publish keys** → **Create key** → 🖨️ **Card**.
- 4 Share: **Join codes** → read out the **Viewer** code, or 📶 **Share link** / 🖨️ **Poster**.
- 5 Watch: **Open Viewer** ↗ · **Open Map** ↗.
- 6 Done: drones powered off → **End mission**. Every viewer is cut off and the codes change.

Check: Live feeds lists every drone and camera that is streaming.

IF ... THEN

- | | |
|---------------------------------|---|
| IF “Still streaming” | → Drones still on. Power them off. Stuck → type END in the box → End anyway . |
| IF A drone isn't showing | → Live feeds → rejected publish attempts shows why. |
| IF A code leaked | → 🔄 Rotate it. Everyone on the old code is signed out. |

Never share the admin code. It can end missions and manage keys.
