

Use when: You are about to fly and stream.

Access key

Drone name

- 1 Power on the controller and the drone. The controller needs internet. Log out of DJI FlightHub 2.
- 2 Pilot 2 home screen: tap **SARStream**.
First time: **Cloud Service** → **Open Platforms** → sarstream.org/dji/pilot.html
- 3 First time only: type the **Access key** and **Drone name**. Check **Pairs with:** shows your agency. Tap **Connect**.
- 4 Stay on the page. Wait for **live stream started**.
- 5 Back arrow to fly. Video and map keep running.

Check: Stream: LIVE in green, and the **telemetry** chip is green.

IF ... THEN

IF “Restart the Pilot app ... cloud link is stuck” → Swipe Pilot 2 away, reopen, tap **SARStream**.

IF Battery swap → Power the drone back on. Video restarts by itself. Not back in 3 min → tap **Start stream**.

IF New drone name or key → **Disconnect** → **Pause video and disconnect** → change it → **Connect** → **Start stream**.

Phone: viewer → **Go Live** → **Go Live**. Keep the screen on.

Body cam / GoPro: scan the key card QR → name → **Copy URL** into the camera.
